**Batch - B2**

# INTRODUCTION

- **Team Information:** A dedicated Teams section in the navbar lets users explore detailed pages about each team, including player statistics, photos, videos, and historical match data. These pages ensure fans can access both the latest team performance data and deeper insights into each team's journey in the sport.
- **User-Friendly Interface:** The design is meant to make navigation seamless, whether users are checking the latest scores, diving into a team's history, or reading match previews. The clear layout and organized content enhance usability for cricket enthusiasts of all levels.
- **Content Variety:** Beyond live scores, the website also includes cricket rankings, schedules, and news updates, so users can stay informed about upcoming games, team standings, and trending topics in the cricket world.

# Technologies Used

- HTML / CSS
- Bootstrap 4
- Bootstrap 5
- Javascript

# Outline

- **Project Overview**

**Project Name: Cricket Live Website**

**Goal:** To provide real-time updates for live cricket matches, detailed team and player information, match statistics, and news in an interactive, user-friendly interface.

- **Features and Functionalities**

- Live Section
- Scoreboard
- Display current match score for both teams
- Show details like current batsmen, bowler, current run rate, and required run rate
- Toss winner, match venue, and other match details

- **Live Commentary**

- Display ball-by-ball commentary with special color coding
- Green for fours
- Blue for sixes
- Red for wickets

- **Teams Section**

- Team Pages
- Each team has a dedicated page with detailed information, including
- Roster of players with stats
- Photos and videos
- Team history, notable matches, and achievements

- **Navbar**

- Home, Schedule, Players, Photos, Videos, Stats
- Newbiee (for newcomers or interesting cricket facts)
- Additional Features

- **Ranking**

- Display team rankings based on recent performance

- **Match Schedule**

- List upcoming matches with dates, times, and venues

- **News Section**

- Latest cricket news, player interviews, and updates

# Advantages

- **Comprehensive Information:** The site provides detailed insights into teams, players, rankings, and match schedules, making it a one-stop source for cricket enthusiasts.
- **User Engagement:** With live commentary and match highlights, the site keeps users engaged throughout the game. The special color coding for fours, sixes, and wickets makes it visually appealing and easy to follow.
- **Team Pages:** Dedicated pages for each team with information like player stats, photos, and videos enhance the user experience by offering deep dives into each team's performance and history.
- **Easy Navigation:** The organized navbar, with sections for news, players, stats, and more, ensures that visitors can quickly find the information they need.

# Disadvantages

- **Mobile Responsiveness:** If not properly optimized for mobile devices, users may face difficulties reading live updates or navigating the site on smaller screens.
- **Content Management:** Keeping all the information (scores, commentary, stats) up to date, especially across multiple team pages, could be time-consuming and require constant monitoring and editing.
- **Limited Interactivity:** While there are stats and commentary, more interactive features like live polls, fan chat rooms, or match predictions could enhance engagement and attract more visitors.

# Future Scope

- **Login / Signup:** Allow users to create accounts, follow their favorite teams, players, and matches.
- **Personalized Dashboards:** Show customized news, match schedules, and player stats based on their preferences.
- **Match Notifications:** Users can receive notifications for their favorite team's matches, scores, or breaking news.
- **Polls & Predictions:** Users can participate in match predictions, polls, and trivia, with leaderboards showcasing the best predictors.
- **Commentary Feedback:** Users can contribute to the commentary or rate the ongoing match, creating an interactive experience.

**THANK YOU!**
